ADDITIONAL INFO

The true embodiment of a buffalo bull, Ngeny's formidable presence and impressive stature, together with his remarkable horn volume, size and shape, are a wonder to behold. Ngeny originates from extraordinary and high-performing sire and dam lines. In 2005, we were fortunate enough to acquire Ngeny's sire, the 'Kenyan Bull', imported by Mike Englazakis from an Austrian zoo. We had no idea that this bull of unique Kenyan genetics, would years later, sire six sons (including Ngeny) over 50" out of just 20 bulls that he sired, marking an impressive 30% success rate of sons over 50". Ngeny's dam, Aidah, has also produced two 50" sons (53⁷/₈" Ngeny and 50" Rundu), each from different sires. Ngeny is a proven bull, with many magnificent young progeny at foot. His temperament is calm, yet at the same time assertive and protective of his herd. In his prime at 12 years and 4 months, Ngeny has many productive years of breeding ahead, offering the discerning breeder a remarkable once in a lifetime opportunity to extend and enhance the legacy this magnificent bull carries.

ADDITIONAL INFO

Ntabankulu means "the great mountain" in Xhosa. During the darting of this bull, he ventured up a hill with no road access. When asked if they should land and wake him up, the pilot replied, "Climb the mountain, it will be worth it." This young Leba son shows enormous potential. He is still growing, and his bosses are still soft. He resembles his sire remarkably. Ntabankulu's maternal grandsire appears in the lineage of several exceptional animals, including Yellow 69, the dam of Zsa Zsa (a 37"+ young cow).
